CHAD READEY

(708) 205-6633 | cr3500@columbia.edu | linkedin.com/in/chad-readey/ | github.com/chadreadey

EDUCATION

Columbia University New York, NY
Master of Science Aug 2025 - Dec 2026
Master of Science in Management Science & Engineering | Innovation Concentration

Northwestern University Evanston, IL
Bachelor of Arts Sep 2021 - Jun 2025
Bachelor of Arts in Data Science | Minor in Business Institutions | BIG10 All-Academic Team '23, '24, '25 | Baseball Student-Athlete

RELEVANT EXPERIENCE

The Vistria Group Chicago, IL
Consultant, Data & AI Aug 2026 - Present
Data/AI Intern Jun 2026 - Aug 2026

- Designed and shipped a six-agent research system that decomposes complex themes across independent analytical lenses, evaluates competing hypotheses against identified variables, and synthesizes findings to surface causal relationships
- Developed and deployed a natural-language interface over firm's proprietary CRM; engineered a mediation layer to validate model-generated intent, create parameterized queries, and enforce permission gating before operating against sensitive data
- Created production AI workflows with structured error-handling, observability, and a 5-class failure taxonomy to improve debugging, reliability analysis, and iterative model improvement

Crystal Venture Partners New York, NY
Embedded Engineer Dec 2025 - May 2026

- Architected an agentic research system to interpret inbound requests, ingest unstructured documents, retrieve external evidence, evaluate risk factors, and synthesize findings into decision-ready briefs
- Iterated the system through a human-in-the-loop evaluation process with domain experts, incorporating feedback on research coverage, evidence quality, risk identification, synthesis accuracy, and decision usefulness
- Constructed autonomous data-quality agents to sanitize records, classify entities, and automatically update 2000+ entries, converting recurring manual data-maintenance workflows into automated pipelines

Handshake AI Remote
Model Validation Expert - ML Specialist Sep 2025 - Nov 2025

- Implemented multimodal model evaluation tasks requiring image-grounded knowledge retrieval and reasoning, testing LLM performance across 15 combined text-image contexts
- Established modular agent workflows combining LLM reasoning, code generation, and feedback loops to streamline ML experimentation and performance improvement across 5 AI agents

Public Equity Group Remote
Graduate Fellow Apr 2025 - Sep 2025

- Delivered user research insights, shaped product roadmaps, and increased user retention by 15% for an Edtech client
- Drove a $990K cost reduction proposal and helped leadership assess financial sustainability scenarios for an at-risk firm

SELECTED AI & RESEARCH PROJECTS

Evidence Gap Mapper - Pharmaceutical Evidence-Gap Analysis 2026 - Present

- Built an agentic evidence-synthesis pipeline that retrieves and classifies pharmaceutical studies across 8 clinical/economic outcomes x 6 study designs, identifying unstudied combinations as candidate HEOR and RWE research gaps
- Designed an expert-grounded evaluation framework comparing model outputs against pharmacist-labeled gold cases, with precision-based release gates for evidence-gap claims and ambiguous expert labels excluded from headline scoring
- Developed retrieval stress tests for healthcare-specific failure modes, including brand/generic/biosimilar naming variation and conference evidence not indexed in PubMed
- Created a 14-category annotation protocol enabling pharmacists without software backgrounds to construct reproducible expert-labeled gold cases in approximately 3-4 hours

AI Financial Analyst

- Architected a research pipeline running six specialist LLM analysts in parallel across structured filings, market data, macroeconomic indicators, sentiment, and retrieved research before evidence-grounded synthesis
- Designed an evaluation-first reliability framework with 1,058 tests spanning orchestration, quantitative signals, grounding, point-in-time controls, API behavior, and failure recovery; implemented purged cross-validation and walk-forward testing

SKILLS

AI Systems: LangGraph, LangChain, OpenAI/Perplexity/Anthropic APIs, RAG, tool calling, MCP, Pinecone, LLM evaluation
Engineering & Infrastructure: FastAPI, asyncio, Pydantic, pytest, Github Actions, OpenTelemetry, PostgreSQL, GCP, Azure, n8n
Languages & ML: Python, SQL, Pandas, TypeScript, R, Gurobi, scikit-learn, PyTorch, statsmodels, Numpy, XGBoost, CatBoost
